Background

Projects

Independent Media Production and Broadcasting Studios

July 2013

This is a new venture. To summarize the creation of WBM (confidential name) Studios, my websites have been under constant attack by several major media outlets that find my content unworthy of publication. They have used their power to DoS my websites through invalid abuse reports, fabricated stories of wrong-doing, and flat-out blackmail at times. The idea that media could be so controlled by so few people, based purely on "rules" and "money" was absurd to me. So, I took the small amount of capital we had saved before going NP and leased 1500ft2 of studio space, added an audio recording booth, green screen set, and actual video set. I created the company to be stable by adding backstops of "protected entities" and I have built the entire backbone for production, broadcasting, and dissemination of media without a solitary dollar of investment money. This allows us to be "in control not be in control".

We begin broadcasting our news to 60K residents of Pinellas County, FLA in Sept. 2013 and will expand our systems Nationwide through crowd-funding and social networking support teams. This media backbone is in place to provide alternative media, stable communications, and emergency bandwidth to censored territories. The larger ambitions in the project include a nano-sat launch every 3-5 years and integration into the Containers of Care Outreach Community. **less**

Containers of Care

January 2013 – Present

In late 2012 my life took a dramatic turn and I have stopped working as an Internet Marketer and have, instead, focused on my calling to be in Ministry. For years I struggled with the need to support a family and the Holy Spirit calling me to give. After a lot of soul-searching and a lot more prayer, we have moved into the Non-Profit Charitable sector. Our first Outreach is a Center for Battered and Displaced Families. Using Rural Housing grants, recycled materials, eco-friendly building practices, and renewable energy we are building homesteads in semi-rural communities with a focus on sustainable and responsible living with reduced expenses.

Due to the level of ambition in this project, it is going to take a few years of funding. Don't expect overnight updates on this project, but it has certainly not been terminated or evacuated. **less**

Summary

After many years as an Online Consultant I have made the commitment to God and the Community to dedicate my life to Non-Profit causes. I realize that there will never be success in the dollar bill and I have been working for the root of evil in every way that I could. I have made greedy people a lot of money off the backs of hard-working citizens. I have focused on the problem and not been a part of the solution and it is time for my family to make a change.

We started the Containers of Care Outreach Program, a non-profit Spiritual Mission aimed to end homelessness among families and battered women. We have a process to secure land, build homes, and provide resources to help homeless families start over, battered women, get away, and families stricken with economic burden to strip away that burden and have hope again.

The Containers of Care Project is working with the USDA Rural Housing Loans, multiple donors, and a team of pioneers to build self-sustainable communities that give back to the environment and the community. To learn more about Containers of Care, please contact me. If you would like to participate in housing families in need in their own rural home we would love to speak with you.

Experience

Mercenary

Media Mercenary

August 2014 – Present (5 months)

I am a what you may call a "Social Engineer" and have done work for several information security teams. My most recent operation was with a research team doing propaganda analysis for a media firm. I have a unique ability to access data that is typically inaccessible through social engineering and use this ability to gather data for research purposes. I have a knack for data mining and analysis, but was not formally trained so am able to think outside the box and accomplish goals traditional infosec students could not. I am proficient at strategic planning and vulnerability analysis and am often busy dissecting malware and tracking the criminals behind such software. There's no real title for what I do, but I do it well I am told.

Youth Outreach Coordinator

The Church of Common Good

January 2013 – Present (2 years) | St Petersburg, FL

The Church of Common Good is a seed church based on the Christian faith, but focusing very little on spiritual teachings and condemnation. Instead, COCG has decided The Church best serves as an Outreach Ministry and is not tax-exempt via 501(3)(c).

We have purposefully avoided becoming an "institution of the government" in efforts to maintain the integrity of the church as an "institution of God". COCG Ministries leads several crowd-funded outreach projects including; Containers of Care, Water of Life, Beat the Heat programs for battered women and children, clean water distribution, and homelessness. The Youth Outreach works with urban youths to learn skills for media production, well-drilling, metal fabrication, and harnessing natural energy.

The COCG Ministries efforts have an ultimate goal of producing a self-sustainable community, constructed of all green and recycled materials that will stand the test of time, serve as a retreat or respite, short-term housing, and learning facility for self-sustainability and life-changes.

Digital Dollars

IBT, Inc. Media

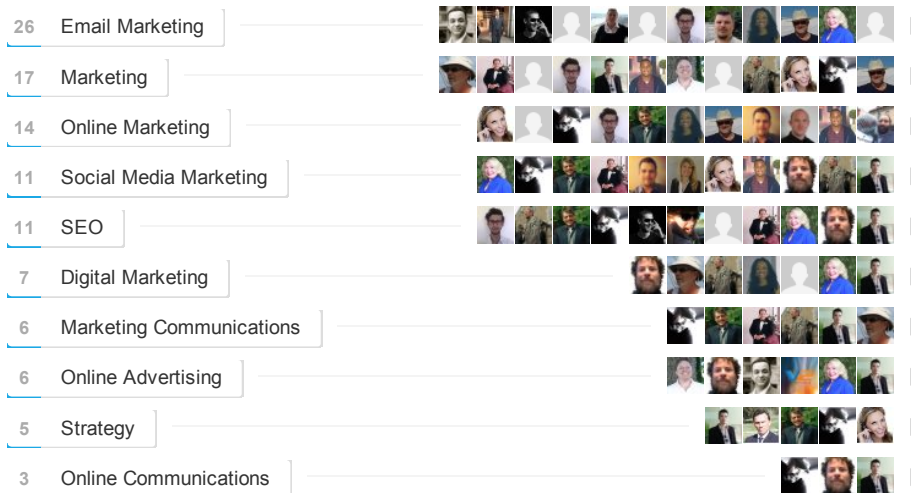

October 5, 2012

Digital Dollars is beginner to intermediate level guide to successful list marketing in today's email environment. It incorporates the use of both white hat and some sketchy techniques you would find on black hat forums, but has avoided anything illegal or unethical...which you would also find on black hat forums.
