## Orcus Plugin Development

This is a list of plugins I am currently in development with and will be released upon when ever I feel they are stable and presentable! These plugins will most likely be unofficial due to the nature and moderation of the plugins. I have no current order or ETA of any plugins. Some of these plugins were suggestions and ideas of what I thought would be useful for Orcus users!

### Current Plugin Project List:

#### [Survey Bot](#)

*This will use a site of my choice to make all of your clients do surveys for cash.*

#### [USB/.zip/.doc spreader](#)

*Will spread a file of your choice to all clients via USB/.zip/.doc macros*

#### [Shoutbox - multi-featured](#)

*This will add a tab to Orcus for a global user chat, users will be defined by license key and will be able to have nicknames. Chat will have filters and moderation. There will be multiple channels for a more categorized chat.*

#### [VirusTotal Checker](#)

*Will check a file of your choice to see if it had been scanned on VirusTotal.*

#### [AppCluster](#)

*Will start chosen programs upon Orcus starting up, files will be downloaded.*

#### [Adsense Injector](#)

*Will hijack ads on pages and replace them with your Adsense ads, this will also disable adblocker on Chrome.*

#### [Vine Soundpack](#)

*Sounds of popular Vines.*

#### [IconMixer](#)

*Will mix all icon/shortcut names around on the desktop.*

#### [Clipit Revived](#)

*A small version of Windows XP helper, Clipit, not fully functional, more of just a troll.*

### Recommendations/Suggestions:

#### [ScreenLocker](#)

[MazeGame](#)

[FolderNotifier](#)

[BetterProcessHandling](#)

[FakeMonitor](#)

[Chatbot](#)

[DisableComputerManagement](#)

[FakeCrashing](#)

I am open to suggestions for plugin ideas, I want to make plugins based off of what the community wants! Please do not suggest anything malicious, or fraudulent, it will be denied.
